|--------------------------|---|
| Project Title | SUPPLY & INSTALLATION OF A COMPUTER WITH BROADBAND CONNECTION AT WAKANOM COMMUNITY HEALTH POST |
| Project Location: | WAKANOM COMMUNITY HEALTH POST |
| Province | WESTERN HIGHLANDS PROVINCE |
| District | MUL BAIYER |
| LLG | MULLLG |
| Ward | JIKA KUIPGIL AND NENGA TRIBES |

Project summary

While we are now in the computer age, a larger fraction of our population do not possess the necessary knowledge and skills to use the ITC services that are available to gain maximum benefit. This problem can be reduced by training and giving people the opportunity to use the services. People will remain IT illiterate they are denied this chance.

The provision of ITC services for health workers at Wakanom Community Health Post will enable them to access information on different types of health issues, treatment options (new & improved) available drugs, medical research papers, etc. In PNG there may be new health issues appearing due to lifestyle and climate changes which can be attached with the right knowledge and that can be available on the internet. Secondly Medical staff from rural establishments within the province like their public servants counterparts would in most cases vacate place of work to attend to administration matters. This is lost work time and a financial loss to the state. With this network all administrative queries can be handled from work stations.

The ITC setup for this health facility will have one standalone computer with broadband service for all facility staff to use. Additional equipment will be a network printer for all to print documents. All equipment will be provided with backup power (UPSs) to allow users to save work during power outages. Access to prohibited sites will be achieved by installing a PC with Firewall before connecting to the desktop computer.

The WHPHA has an organizational ITC network plan in place but did not implement it due to insufficient funds. The plan was to connect all outstations to the main HUB located at the Mt. Hagen General Hospital. The Authority is pleased to see NICTA involvement to help fulfill its plans and are committing counterpart funding of 20% of the total project costs.

The WHPHA has IT personals to maintain this project and will sustain it through its annual operations costs.

Install Digicel PNG broadband access system to provide broadband service. Digicel is the only operator offering a better coverage in this area.

| Project Cost | Requested Amount | Own funding |
|--------------|------------------|-------------|
| K18,121.40 | K14,497.12 | K3624.28 |

Duration of the Project

From August 2019 To August 2019

It is anticipated, this project will take at least four weeks to complete from equipment order to installation, testing and commissioning.

Project Details

| Please describe outline of the pilot project | |
|---|--|
| Objectives | Provide one computer with Broadband service for Wakanom Community Health Post. |
| Purpose of Project | Offer health workers from Wakanom Community Health Post. The opportunity to use ITC services to improve performance and communicate with headquarter staff regarding patient care, medical supply orders and administrative functions. |
| Outline of pilot project | <p>We propose to setup one standalone desktop computer with broadband connection. Additional items will be a network printer/copier/scanner for printing and photocopying work and scanner for scanning and emailing documents.</p> <p>Accessing prohibited sites will not be allowed on this setup. We will install PCs with Firewall to achieve that. This setup will then be configured to be part of the Western Highlands Provincial Health Authority network. The entire network equipment will be supported with floor mount backup power (UPS) during power outages. This will allow users to save their last work.</p> <p>All thin clients will have access to broadband service for medical staff to research new and better knowledge on patient care, obtain further expert assistance from the Mt.Hagen referral hospital on patient care, ordering medical supply and administration functions.</p> <p>The ongoing operational costs including broadband service fees will be included in WHPHA recurrent budget. Maintenance of the setup will be the responsibility of the WHPHA IT personals.</p> <p>The ISP for this area will be Digicel PNG has it provides a better broadband coverage there.</p> |
| Appropriateness of the Project | We are in the computer age. Computers are used just about everywhere and every day. While a lot of countries around the globe have leaped forward in making those services available and enabling all citizen to use them fully to their advantage, this trend is lacking in PNG. One reason is the lack of knowledge on how to use it and the opportunity to use it. This project will provide the chance for health workers to improve their performance and patient care. It will also create an opportunity for computer illiterates to learn to use computers and the broadband service. |
| Number of Persons benefiting from the project | <p>Wakanom Community Health Post serves patients from the above tribes. It is operated by 4 staff. It handles approximately 20 patients daily.</p> <p>This project if implemented will benefit the 4,000 plus people of above tribes and 4 staff of the clinic</p> |
| Project Benefits | The benefit of having this project is improved health services and patient care for the 4,000 plus people of above tribes. |
| Partner organizations/institutions (if any) | The Western Highlands Provincial Health Authority manages all health facilities within the Western highlands Province. The office of the CEO WHPHA has made a commitment of 20% of the total costing to support this project. Please find attached the letter (attachment "A") confirming their commitment to work in partnership to successfully implement this project in the form of counterpart funding. |
| Milestone(significant phases of the project) | This will be a very small installation. Basically it will consist of two stages. First is the order of all equipment and materials followed by installation, testing and commissioning. It will last approximately four weeks. It will be completed with a basic computers skills training for users. The training will be conducted by the WHPHA through its internal training programs. |

Annex 1

| <p>Expected output</p> | <p>This project will produce computer literate 4 medical staff of the hospital with new and increased knowledge of ITC services. This knowledge will be transformed to improved patient care and staff performance. Staff will research information on patient care, reading medical research in latest discoveries which should also increase their knowledge of the medical field. Patient care will be improved from ensuring (ordering) medical supplies and have them readily available on site. It will also and communication with Mt.Hagen hospital regarding referral patients and patients needing. Regularly staff leave job site and go to Mt.Hagen headquarters to attend to administration matters. These queries can be handled form their work station after the operation of this project, meaning more time for patient care.</p> <p>All the above will contribute to the better and improved patient care. In the end it's the 4,000 people of above tribes plus the 4 staff members to benefit from this project.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | |

| <p>Reporting Procedure</p> | <p>The WHPHA through its Information Systems Manager, Dr. David Johnson will oversee the implementation of this project. Dr. Johnson will report to NICTA project manager issuing weekly progress reports. The contractor is also expected to issue biweekly project progress reports to Dr. Johnson.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | |

Annex 1

| | |
|---|---|
| Reporting Procedure | The WHPHA through its Information Systems Manager, Dr. David Johnson will oversee the implementation of this project. Dr. Johnson will report to NICTA project manager issuing weekly progress reports. The contractor is also expected to issue biweekly project progress reports to Dr. Johnson.. |
| Linkage to existing Government development policies | Internet usage by the population is growing but at a low pace. The reason being most are computer illiterate and not having the opportunity to use them. The project will address these problems through training users (health workers). This will further help increase staff knowledge on their job thus increasing productivity and improve the welling being and health of the people of Dei District. |
| Financial Support | The Western Highlands Provincial Health Authority (WHPHA) will support this project by counterpart funding 20% of the total establishment cost. Please refer to attachment "B", pledging it's support for this project. |
| Sustainability of Project | Annual running costs for this facility will be for service fees, purchase of consumable, power bills, broadband service, etc. The WHPHA to fund these costs from its recurrent operational budget. |

The intended project implementation period is four weeks. This time is considered sufficient while accommodating any unforeseen circumstances likely to cause delays.

Weeks # 1 - 3

- (a) Place orders for all hardware (computer, server, cables, etc)
- (b) Place order for Digicel Broadband connection equipment
- (c) Pre installation site visit
- (d) WHPHA to conduct in house IT skills training for staff @ Mt.Hagen hospital
- (a) Install network cable and accessories & electrical GPOs

Weeks # 4

- (a) Install Digicel Broadband access equipment
- (b) Installation of network equipment, test and commission

NICTA FUNDED UAS PROJECT 2020

This letter is to advise that the WHPHA supports the **ICT SERVICE CONNECTION FOR RURAL HEALTH FACILITIES WITHIN the WESTERN HIGHLANDS PROVINCIAL HEALTH AUTHORITY** project as put forward by Highcoms Engineering Limited.

As background the WHPHA is deploying a Province wide Health Information System (ePMRMS) across the province and throughout the Highlands Region. We have made substantial investments in a Data Centre and ICT Infrastructure over the past 5 years and have fully deployed ePMRMS at Mount Hagen Hospital.

We recently installed a 4.5m C-BAND Satellite Dish as the Hub of this network and will be connecting up our three District Hospitals over the next 12 months. We are pleased to support this project as it will allow us to integrate our Community Health Posts of which there are around 33 detailed in the proposal.

The WHPHA will continue to invest in this project and proportionately fund any successful proposal.

Dr David Johnson
Chief Information Officer

7/6/2019.
