### Project Information

<b>Project Title</b>	<b>ESTABLISHMENT OF COMPUTER LABOARTORY WITH BROADBAND CONNECTION &amp; COMMUNITY INFORMATION CENTER AT TEGA LUTHERAN PRIMARY SCHOOL</b>
<b>Project Location:</b>	TEGA LUTHERAN PRIMARY SCHOOL
<b>Province</b>	WESTERN HIGHLANDS PROVINCE
<b>District</b>	MT.HAGEN CENTRAL
<b>LLG</b>	HAGEN URBAN LLG
<b>Ward</b>	YAMKA PEPKA,KUKLIKA,YAMKA MAIPGIL,KAGAMUGA URBAN 1 & 2

**Project summary**

While we are now in the computer age, a larger fraction of our population do not possess the necessary knowledge and skills to use the ITC services that are available to gain maximum benefit. This problem can be reduced by training the uneducated, thus this proposal is to establish a computer laboratory for the Tega Lutheran Primary School with Broadband Service.

Schools in Mt.Hagen District introduce computer lessons to grade 9 students at Secondary level. The aim of this project is to allow grades 7 & 8 students at Primary schools to commence using computers to do their school work and to enhance their knowledge through information research using the Internet service. A total of 90 computer literate students will leave grade 8 at the end of each year to continue into secondary school. The school anticipates to increase the number of computers and introduce IT course to the lower grades in the future which will see more students benefiting.

This installation will consist of 50 thin client computers connected directly to the server. It will see huge cost reduction on PCs, accessories and software licensing, therefore making it cost effective to operate and maintain. Of the 50 units, 46 will be for students learning with a student ratio of one student to a computer while the remaining four will be for staff to prepare lessons, communicate, student database, research, etc. Additional equipment will be a network printer for all to print documents and projector to allow teachers do overhead lesson presentation. All equipment will be provided with backup power (UPSs) to allow users to save work during power outages.

The school has also decided to include a Community Information Center (CIC) with this proposal. This will consist of one desktop computer with broadband service and network printer/copier. The school will manage the CIC and collect fees from users which will be used to meet ongoing operational costs.

The project will be supported by the school by allocating a building built for this purpose and K10,000.00 cash. It was the Mt.Hagen City Authority, formerly Hagen District Development Authority's plan to establishment computer laboratories with internet connection for all primary schools within the district. However it has been shelved due to financial constraints. The Authority is pleased to see NICTA involvement to help fulfill its plans and are committing counterpart funding.

Project Cost	Requested Amount	Own funding
K262,382.18	K252,382.18	K10,000.00

**Duration of the Project**

From August 2019 To November 2019

It is anticipated, this project will take at least three months to complete from building renovations, electrical outlet installation, work bench construct and install to equipment order, installation, testing and commissioning.

**Contact Point Information** (If contact point is different from the applicant, please fill in as follows)

## Project Details

Please describe outline of the pilot project	
Objectives	Provide a fully furnished and equipped computer laboratory with Broadband connection for the Tega Lutheran Primary School.
Purpose of Project	To enable grades 7 & 8 students from Tega Lutheran Primary School to be computer literate before continuing into Secondary Schools and enable teaching staff to be computer literate and use ITC skills and knowledge to teach and communicate with headquarters regarding administrative matters.
Outline of pilot project	<p>We propose to have a fully furnished and equipped computer laboratory with broadband connection for student learning, lesson preparation and administration duties for teaching staff.</p> <p>The maximum student per class enrollment is 46 at this school. We intend to have a total of 50 thin client computers of which 47 will be allocated for student learning including the teacher while three will be for teaching staff to prepare lessons and administration duties. This will allow for a ratio of one student to a computer.</p> <p>The setup will consist of 50 thin client computers connecting directly via network switches to a rack mounted server. Please refer to attachment "A" for more technical specifications for the server and thin client. Additional items will be a network printer/copier for printing and photocopying work and a projector for overhead lesson presentation.</p> <p>The entire network equipment will be supported with backup power (UPS) during power outages. This will allow users to save their last work. Power consumption for thin clients is very minimal (5watts), therefore we have allowed one desk mount UPS to power two thin clients for 10 minutes. The Server and other rack mount equipment will draw their backup power from a rack mount 1150VA UPS.</p> <p>The computer laboratory will have access to broadband service for student and staff research and administration functions. The preferred ISP in this project will be Telikom which offers affordable broadband service rate and a very cheap voice service via its Wimax wireless service. The Wimax service comes with a single voice service (one telephone line) to complement the internet/email for administration purpose.</p> <p>To help sustain the project we are incorporating a Community Information Center (CIC) to be operated by the school. The CIC will consist of one computer with broadband connection and a printer/copier. This setup will provide internet/email services, typing/printing and photocopying documents. Fees collected from users will help meet operational costs of the computer laboratory.</p>
Appropriateness of the Project	We are in the computer age. Computers are used just about everywhere and every day. While a lot of countries around the globe have leaped forward in making those services available and enabling all citizen to use them fully to their advantage, this trend is lacking in PNG. One reason is the lack of knowledge on how to use it. This project will address this problem by passing out 90 students (grade 8) annually with the necessary basic IT knowledge and skills.
Number of Persons benefiting from the project	<p>Tega Primary School enrolls a total of 160 in grades 7 &amp; 8 annually. This project after implementation will equip students with basic IT knowledge to continue to secondary level. For those dropping out of grade 8, the knowledge acquired will help improve and sustain their living.</p> <p>Teachers sometimes miss student teaching hours to attend to administrative queries in town. This proposal will allow teachers to have access to internet/email services to communicate with headquarters. Teachers will also use it prepare school work and research. Twenty two teachers will benefit from this project.</p> <p>The Community Information Center will benefit over 8,000 population of the surrounding and neighboring villages to use this facility to surf the internet, typing, sending and receiving emails and printing documents.</p>

Annex 1

Project Benefits	This project will be incorporated with a Community Information Center (CIC) .It will not only benefit students, but the public from the local community and surrounding villages through the use of the CIC, making available IT services in the community level. Teachers from Tega Primary when transferred out to other schools will impart these skills and knowledge to students in other schools. Overall a good number of Papua New Guineans will benefit from this project annually.																		
Partner organizations/institutions (if any)	Establishing computer laboratories with broadband connection for primary schools within the Mt.Hagen City Authority (formerly Hagen District Development Authority) has been planned since 2012. However it was unable to execute it due to insufficient funds. The Mt.Hagen City Authority is now supporting this project to help realize its plan. Please find attached is a letter (attachment "B") confirming their commitment to work in partnership to successfully implement this project in the form of counterpart funding.																		
Milestone(significant phases of the project)	The school has allocated a building for this project. The first phase of this project will be the renovation of the building (internal paint work) and installation of security grill doors and windows. Next is delivery of chairs and construction and installation of work benches/stations and should. The third phase is the installation of electrical and network outlets. Next will be installation, test and commissioning of the IT network equipment. Finally basic computers skills training will be conducted for one teaching staff who will then return and conduct internal training for others in the school.																		
Expected output	This project will produce computer literate students and teachers. Annually the school will produce 90 computer literate students leaving grade 8. It will also enable teaching staff of the school to be proficient in the use of computers using different student learning programs, email and internet services for research and administrative duties. Teachers will be expected to spend more time in classrooms.																		
Project Risks	<p>What are the risks to the Project? How will they be overcome or managed? (See management table)</p> <table border="1" data-bbox="336 1003 1453 1792"> <thead> <tr> <th data-bbox="336 1003 496 1234">Risk -List all possible risks you can think of</th> <th data-bbox="496 1003 655 1234">Consequence</th> <th data-bbox="655 1003 815 1234">Probability</th> <th data-bbox="815 1003 1453 1234">Risk Management/Mitigation plan</th> </tr> </thead> <tbody> <tr> <td data-bbox="336 1234 496 1451">Lack of political or administrative support</td> <td data-bbox="496 1234 655 1451">4 – Extreme 3 – High 2 – Medium 1 -Low</td> <td data-bbox="655 1234 815 1451">4 – Almost certain 3 – Likely 2 – Positive 1 - Unlikely</td> <td data-bbox="815 1234 1453 1451">This proposal is supported by the political arm of the Mt.Hagen District Development Authority or now known as Mt.Hagen City Authority. Land not secured	1	1	Land is secured as it is an established school and does not have any outstanding land issues. However if the issue does arise the school will deal with it through the school board which as representatives from the local community, villages and council wards (tribes).																
Security	1	1	This school has been initially established by the neighboring community. Security has never been an issue. There is a fulltime security officer for the property however if such issues does arise the community will address it. The building will be secured with grill doors and window and sufficient external lighting																

Annex 1

	Project Equipment Personalized	1	1	The school will have a small committee who will be tasked to handle the safe keeping and long term maintenance and sustainability of the facility. This arrangement will help reduce the chances of this problem.
	Lack of community support	1	1	The school board has representatives from villages and tribes who enroll students in this school. These members will communicate with individual or groups of parents to gain their support for this this project. This can be financial contribution for further improvements and expansion of the projects or any other related issues.
	Maintenance & recurrent costs	1	1	Running costs of this facility come from annual school and project fees collected from grades 7 & 8 students and other donations and grants from the government.  We are also proposing a Community Information Center to be operated by the school. Income generated from the CIC will pay for running costs of the computer laboratory.

**Reporting Procedure**  
The Mt.Hagen City Authority as the manager of all lower learning institutions in the district will oversee the project implementation. Its Education Executive Manager, Mr. Steven Ronumo or his appointee will issue biweekly project progress reports to NICTA project manager. The contractor is also expected to issue biweekly project progress reports to Mr. Ronomu or his appointee.

**Linkage to existing Government development policies**  
Internet usage by the population is growing but at a low pace. The reason being most are computer illiterate. The project will address this problem through education. With a computer literate population will trigger increase knowledge, economy growth, increase workers (teachers) performance and creates more source of information.

**Financial Support**  
The school will allocate a building built for this purpose and contribute K10,000.00 cash for this project while the Mt. Hagen City Authority as committed counterpart funding for this project. Refer to letter from the school and authority labeled as attachment "C", pledging it's support for this project.

**Sustainability of Project**  
Annual running costs for this facility will be for service fees, purchase of consumable, power bills, broadband service, etc. The school intends to fund these costs from school and project fees and income form the Community Information Center.

The intended project implementation period is three months. We have allowed two months of actual work, however an additional month is included to accommodate any unforeseen circumstances causing delays.

- Week # 1**
- (a) Place orders for all hardware (computer, server, cables, etc)
  - (b) Place order for Telikom 4G Wimax Broadband connection
  - (c) Pre installation site visit

- Weeks # 2 - 3**
- (a) Building renovation – construct & install grill door and windows
  - (b) Building renovation - internal wall painting

DEPARTMENT OF WESTERN HIGHLANDS  
Division of Education

TEGA LUTHERAN PRIMARY SCHOOL

("A member of the health promoting schools in Papua New Guinea")

P.O. Box 1517  
MOUNT HAGEN 281  
Western Highlands Province  
Papua New Guinea.  
Code No: 261

Telephone: (675) 545 1353

Date: 16<sup>th</sup> May, 2019

The Education Manager,

**Mt. Hagen City Authority**

P.O. Box 787

Mt. Hagen 281, WHP.

Dear Sir,

**Ref: Accepting NICTA Services Projects.**

**Attention: MR. STEVEN A. RONOMU.**

Sir, thank you for bringing NICTA to Tega Primary School.

We thankfully accepted NICTA Service Projects with open arms to have our school to be part of others within the vicinity of Mt. Hagen City Authority. As we are mindful of the fact that ICT will equip our children and teachers with profound skills and knowledge which will unquestionably lead them into the modern technological age.

We therefore, will be a very proud recipient and looking forward to cooperate with NICTA and your reputable office and hope that the long missed services happen too soon at our school, for the good of 1411 students and 37 members on the staff – 2019.

Regarding housing of computers etc, we have classrooms which need minor renovation if we can't set up a computer lab. We also have schools security on guard to care for students, staff & families and the school properties and security wise is safe.

We conclude here and pray that what is there to serve Tega Primary School, let it happen. Thank you. God bless you and your new work.

Yours In Education.

  
MR. ABEL WAMA

**SUBJECT: UNIVERSAL ACCESS SERVICE PROJECTS FOR 2020**

Thank you very much for identifying a number of primary schools within the Mt Hagen City Authority to benefit from the above project funded by NICTA.

We understand you are submitting proposal for Establishing Computer Laboratory with Broadband Internet Connection.

This is one of the Authority's plans for all schools however it has not been implemented due to financial constraints. We will support this project with a counterpart funding of K1 million and support in any way possible to see this project be a success.

Yours Sincerely

**STEVEN RONOMU (Mr)**
