Papua New Guinea Radiofrequency Spectrum Allocation Chart

The chart illustrates how the radio-frequency spectrum is allocated among radio-communications services in Papua New Guinea. It is derived from the Papua New Guinea Spectrum Plan or Frequency Allocation Table (2017), which in turn is based on the International Telecommunication Union (ITU) Radio Regulations (WRC-2015).

Each of these bands is divided into sub-bands which are allocated to particular services shown in the chart by different colors. The chart is designed for quick reference. For details of frequency allocations, reference should be made to any latest amended Band Plans, PNG Frequency Allocations Table and PNG footnotes.
