

National Information and
Communications Technology Authority

TYPE APPROVAL ONLINE PLATFORM NOTICE

The **National Information and Communications Technology Authority (NICTA)** wishes to advise the general public that NICTA has officially activated the **Type Approval Online System** at <https://ta.nicta.gov.pg>, following its recent soft launch. This new platform is now mandatory for the registration, certification, and import of ICT equipment into **Papua New Guinea**.

Type Approval is required for all ICT products—such as mobile phones, radios, broadcasting devices, drones, and smart technology devices—before they can be sold or used in PNG. This ensures that products are safe, meets standards, and does not harm public networks or users.

All importers, ICT dealers, and overseas agents must now **register online** and use the system to submit applications, request import permits, and make payments online. The platform connects with PNG Customs for ICT products clearance at entry points in Papua New Guinea. Scan the QR Code below to register now or visit <https://ta.nicta.gov.pg>:

NICTA has a standing MOU with PNG Customs to enforce compliance and control of ICT equipment or products entering PNG. For inquiries, email: typeapprovals@nicta.gov.pg or contact Mr. Agua Kolkia and Mr. George Alokaka on : +675 3033 200.
